EXHIBITS (If Applicable, To Be Attached): Contract with Tyler Technologies.

POSSIBLE MOTION

I move to award the purchase of the new Town financial software system to Tyler Technologies – Incode Division and authorize the Mayor to sign all necessary contract documents.

SUMMARY OF THE BASIS FOR POSSIBLE MOTION:

A Request for Proposal was issued in fiscal year 2006/2007 for financial software packages to replace the outdated financial software in use. Three (3) proposals were received: Springbrook, New World Systems and Tyler Technologies – Incode. Demonstrations of all three systems were held in May 2007 for all Town staff and members of the Finance Task force. After the demonstrations, phone calls were placed with users of the various systems to discuss their experience with the systems. Based on the capabilities shown in the demonstrations, the expected fit with the Town, and the responses from the phone calls, staff has selected Tyler technologies – Incode as the best software system for the Town. The remaining budget will be used for hardware to run the new program.

PROS: A new software system will allow for better financial reporting, ease of use by Town staff and integration between the utility billing/cash receipting system and the Town General Ledger.

COMPANY AGREEMENT TERMS AND CONDITIONS

General Payment Terms

1. CLIENT will pay to COMPANY an initial deposit upon execution of this Agreement that equals 25% of the total amount as specified in this Agreement, not including Annual Software Maintenance, Third Party Software Maintenance, and/or Hardware Maintenance fees;
2. CLIENT will pay a second installment to COMPANY upon delivery of the software products that equals 60% of the Application Software License Fees and 75% of the System Software License Fees.
3. The remaining 15% balance of the total amount specified in this Agreement for all products and License fees shall be paid after (a) COMPANY's verification of the software products, (b) CLIENT's completion of its own validation process, or (c) CLIENT's live processing. In no case, shall this period exceed thirty (30) days from live processing or one hundred-eighty (180) days from installation of the software.
4. Services shall be billed as delivered plus expenses and are due and payable net 30 days.

Software License Agreement

1) Software Product License.

- a) Upon CLIENT's payment for the software products license fees set forth in the Investment Summary of this Agreement, COMPANY shall grant to CLIENT and CLIENT shall accept from COMPANY a non-exclusive, nontransferable, nonassignable license to use the software products and accompanying documentation for internal business purposes of CLIENT, subject to the conditions and limitations in this Software License Agreement.
- b) Ownership of the software products, accompanying documentation and related materials, and any modifications and enhancements to such software products and any related interfaces shall remain with COMPANY.
- c) The software products are not licensed to perform functions or processing for subdivisions or entities that were not

considered by COMPANY at the time COMPANY issued this Agreement.

d) The right to transfer this license to a replacement hardware system is included in this Software License Agreement. The cost for new media or any required technical assistance to accommodate the transfer would be billable charges to CLIENT. Advance written notice of any such transfer shall be provided to COMPANY.

e) CLIENT agrees that the software products, any modifications and enhancements and any related interfaces are proprietary to COMPANY and have been developed as a trade secret at COMPANY's expense. To the extent permitted by law, CLIENT agrees to keep the software products confidential and use its best efforts to prevent any misuse, unauthorized use or unauthorized disclosures by any party of any or all of the software products or accompanying documentation.

f) If CLIENT has made modifications to the software products, COMPANY will not support or correct errors in the modified software products, unless modifications were specifically authorized in writing by COMPANY.

g) CLIENT may make copies of the software products for archive purposes only. CLIENT will repeat any proprietary notice on the copy of the software products. The documentation accompanying the software products may not be copied except for internal use.

h) The term of the license granted by this Section shall be perpetual.

i) COMPANY maintains an escrow agreement with an Escrow Services Company under which COMPANY places the source code of each major release. At CLIENT's request, COMPANY will add CLIENT as a beneficiary on its escrow account. CLIENT will be invoiced the annual beneficiary fee by COMPANY and is solely responsible for maintaining its status as a beneficiary.

2) License Fees.

a) CLIENT agrees to pay COMPANY, and COMPANY agrees to accept from CLIENT

COMPANY AGREEMENT TERMS AND CONDITIONS

as payment in full for the license herein, the total sum of the COMPANY license fees set forth in the Investment Summary.

b) The license fees listed in the Investment Summary do not include any tax or other governmental impositions including, without limitation, sales, use or excise tax. All applicable sales tax, use tax or excise tax shall be paid by CLIENT and shall be paid over to the proper authorities by CLIENT or reimbursed by CLIENT to COMPANY on demand in the event that COMPANY is responsible or demand is made on COMPANY for the payment thereof. If tax-exempt, CLIENT must provide COMPANY with CLIENT's tax-exempt number or form.

c) In the event of any disputed invoice, CLIENT shall provide written notice of such disputed invoice to Attention: COMPANY Controller at the address listed on the cover of this Agreement. Such written notice shall be provided to COMPANY within fifteen (15) days. An additional fifteen (15) days is allowed for the CLIENT to provide written clarification and details for the disputed invoice. COMPANY shall provide a written response to CLIENT that shall include either a justification of the invoice or an explanation of an adjustment to the invoice and an action plan that will outline the reasonable steps needed to be taken by COMPANY and CLIENT to resolve any issues presented in CLIENT's notification to COMPANY. CLIENT may withhold payment of only the amount actually in dispute until COMPANY provides the required written response, and full payment shall be remitted to COMPANY upon COMPANY's completion of all material action steps required to remedy the disputed matter. Notwithstanding the foregoing sentence, if COMPANY is unable to complete all material action steps required to remedy the disputed matter because CLIENT has not completed the action steps required of them, CLIENT shall remit full payment of the invoice.

d) Any invoice not disputed as described above shall be deemed accepted by the CLIENT. If payment of any invoice that is

not disputed as described above is not made within sixty (60) calendar days, COMPANY reserves the right to suspend delivery of all services under the Investment Summary, this Software License Agreement, the Professional Services Agreement, the Maintenance Agreement and, if applicable, the Third Party Product Agreement.

3) Verification of the Software Products.

a) At the CLIENT's request, within thirty (30) days after the software products have been installed on CLIENT's system, COMPANY will test the software products in accordance with COMPANY's standard verification test procedure. Demonstration shall constitute CLIENT's verification that the software products substantially comply with COMPANY's current specifications for the most current version of the software products and functional descriptions of the software found in COMPANY's written proposal to CLIENT. Upon such verification, CLIENT shall pay the remaining balance in accordance with the payment terms listed in Section General Payment Terms or amended in any attached addendum.

b) At its option, CLIENT may perform CLIENT's own defined internal validation process to test the software to substantially comply with COMPANY's current specifications for the most current version of the software products and functional descriptions of the software found in COMPANY's written proposal to CLIENT. Such validation test shall constitute CLIENT's verification. Upon such validation, CLIENT shall pay the remaining balance in accordance with the payment terms listed in Section General Payment Terms or amended in any attached addendum.

c) Notwithstanding anything contrary herein, CLIENT's use of the software products for its intended purpose, shall constitute CLIENT's verification of the software products, without exception and for all purposes.

d) Verification or validation, by CLIENT, that the software products substantially

COMPANY AGREEMENT TERMS AND CONDITIONS

comply with COMPANY's current specifications for the most current version of the software products and functional descriptions of the software found in COMPANY's written proposal to CLIENT shall be final and conclusive except for latent defect, fraud, and such gross mistakes that amount to fraud and the operation of any provision of this Agreement which specifically survives verification. In the event said verification becomes other than final, or becomes inconclusive, pursuant to this paragraph, CLIENT's sole right and remedy against COMPANY shall be to require COMPANY to correct the cause thereof.

e) COMPANY shall correct any functions of the software products which failed the standard verification testing or failed to comply with COMPANY's current specifications for the most current version of the software products and functional descriptions of the software found in COMPANY's written proposal to CLIENT. If CLIENT has made modifications to the software programs, COMPANY will not make such corrections, unless such modifications were specifically authorized in writing by COMPANY.

4) Schedule of Verification. COMPANY will install the software products and cause the same to be verified within sixty (60) days after CLIENT makes available to COMPANY the equipment into which the software product is to be loaded. COMPANY shall exercise reasonable efforts to cause the software products to be verified according to the schedule set forth in this paragraph, but COMPANY shall not be liable for failure to meet said schedule if, and to the extent, said failure is due to causes beyond the control and without the fault of COMPANY.

5) Limited Warranty. COMPANY warrants that the then current, unmodified version of the COMPANY Software Products will substantially conform to the then current version of its published current specifications. If the Software Products do not perform as warranted, COMPANY's

obligation will be to use reasonable efforts, consistent with industry standards, to cure the defect. Should COMPANY be unable to cure the defect or provide a TYLER replacement product, CLIENT shall be entitled to a refund for the license fee paid for application. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES. TO THE MAXIMUM EXTENT PERMITTED UNDER APPLICABLE LAW, ALL OTHER WARRANTIES, CONDITIONS AND REPRESENTATIONS, WHETHER EXPRESS, IMPLIED OR VERBAL, STATUTORY OR OTHERWISE, AND WHETHER ARISING UNDER THIS AGREEMENT OR OTHERWISE ARE HEREBY EXCLUDED, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

6) Limitation of Liability.

(a) In the event that the software products are determined to infringe upon any existing United States patent copyright or trademark rights held by any other person or entity, COMPANY shall defend and hold harmless CLIENT and its officers, agents and employees from any claim or proceedings brought against CLIENT and from any cost damages and expenses finally awarded against CLIENT which arise as a result of any claim that is based on an assertion that CLIENT's use of the software products under this Software License Agreement constitutes an infringement of any United States patent, copyright or trademark provided that CLIENT notifies COMPANY promptly of any such claim or proceeding and gives COMPANY full and complete authority, information and assistance to defend such claim or proceeding and further provided that COMPANY shall have sole control of the defense of any claim or proceeding and all negotiations for its compromise or settlement provided that COMPANY shall consult with CLIENT regarding such defense. In the event that the software products are finally held to be

COMPANY AGREEMENT TERMS AND CONDITIONS

infringing and its use by CLIENT is enjoined, COMPANY shall, at its election; (1) procure for CLIENT the right to continue use of the software products; (2) modify or replace the software products so that it becomes non-infringing; or (3) if procurement of the right to use or modification or replacement can not be completed by COMPANY, terminate the license for the infringing software product, and upon termination, refund the license fees paid for the infringing software product as depreciated on a straight-line basis over a period of seven (7) years with such depreciation to commence on the execution of this Agreement. COMPANY shall have no liability hereunder if CLIENT modified the software products in any manner without the prior written consent of COMPANY and such modification is determined by a court of competent jurisdiction to be a contributing cause of the infringement or if the infringement would have been avoided by CLIENT's use of the most current revision of the software products. The foregoing states COMPANY's entire liability and CLIENT's exclusive remedy with respect to any claims of infringement of any copyright, patent, trademark, or any property interest rights by the software products, any part thereof, or use thereof.

b) THE RIGHTS AND REMEDIES SET FORTH IN THIS SOFTWARE LICENSE AGREEMENT ARE EXCLUSIVE AND IN LIEU OF ALL OTHER RIGHTS AND REMEDIES OR WARRANTIES EXPRESSED, IMPLIED OR STATUTORY, INCLUDING WITHOUT LIMITATION THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND SYSTEM INTEGRATION.

c) In no event shall COMPANY be liable for special, indirect, incidental, consequential or exemplary damages, including without limitation any damages resulting from loss of use, loss of data, interruption of business activities or failure to realize savings arising out of or in connection with the use of the software products. COMPANY's liability for

damages arising out of this Software License Agreement, whether based on a theory of contract or tort, including negligence and strict liability shall be limited to the COMPANY license fees identified in the Investment Summary. The license fees set forth in the Investment Summary reflect and are set in reliance upon this allocation of risk and the exclusion of such damages as set forth in this Software License Agreement.

7) Dispute Resolution. In the event of a dispute between the parties under this Software License Agreement pertaining to pecuniary damages or losses, the matter shall be settled by arbitration in accordance with the then prevailing rules of the American Arbitration Association.

8) No Intended Third Party Beneficiaries. This agreement is entered into solely for the benefit of COMPANY and CLIENT. No third party shall be deemed a beneficiary of this agreement, and no third party shall have the right to make any claim or assert any right under this agreement.

9) Governing Law. This Software License Agreement shall be governed by and construed in accordance with the laws of CLIENT's state of domicile.

10) Entire Agreement.

a) This Software License Agreement, including the functional description of the software products found in COMPANY's written proposal to CLIENT, represents the entire agreement of CLIENT and COMPANY with respect to the software products and supersedes any prior agreements, understandings and representations, whether written, oral, expressed, implied, or statutory. CLIENT hereby acknowledges that in entering into this agreement it did not rely on any representations or warranties other than those explicitly set forth in this Software License Agreement and the functional description of the software products found in COMPANY's written proposal to CLIENT.

b) If any term or provision of this Software License Agreement or the application thereof to any person or circumstance shall, to any extent, be invalid or unenforceable,

COMPANY AGREEMENT TERMS AND CONDITIONS

the remainder of this Software License Agreement or the application of such term or provision to persons or circumstances other than those as to which it is held invalid or unenforceable shall not be affected thereby, and each term and provision of this Software License Agreement shall be valid and enforced to the fullest extent permitted by law.

c) This Software License Agreement may only be amended, modified or changed by written instrument signed by both parties.

d) CLIENT should return an executed copy of this Agreement to COMPANY. If the Agreement is not returned to COMPANY within 90 days from the issue date, then such Agreement is subject to be voided and prices are subject to change.

11) Cancellation or Termination. In the event of cancellation or termination of this Software License Agreement, CLIENT will make payment to COMPANY for all software products, services and expenses delivered or incurred prior to the termination or cancellation of this Software License Agreement.

12) Approval of Governing Body. CLIENT represents and warrants to COMPANY that this Software License Agreement has been approved by its governing body and is a binding obligation upon CLIENT. CLIENT represents and warrants that funds are appropriated and/or arrangements have been made with a third party financier.

Professional Services Agreement

1) Services Provided. COMPANY shall provide some or all of the following services to CLIENT, as evidenced in the attached Investment Summary:

a) Installation as described in the Investment Summary;

b) Conversion of CLIENT's existing data as set forth in the Investment Summary. CLIENT is responsible for reading and complying with COMPANY's Conversion Statement.

c) Training/Implementation as set forth in the Investment Summary;

d) Consulting/Analysis as set forth in the Investment Summary; and

e) Verification Testing as described in the Software License Agreement.

2) Professional Services Fees.

a) Notwithstanding specific prices to the contrary identified in the Investment Summary, all services will be invoiced in hourly increments as delivered, plus travel and other expenses, plus a 10% travel processing fee. CLIENT agrees to pay COMPANY for the actual amount of training provided. The quantity in the Investment Summary represents only an estimate of time required to complete all phases of this Agreement.

b) Upon the completion of each service day, or group of days, COMPANY will present a Daily Log. CLIENT will sign the report indicating acceptance of the service day and its subsequent billing, or noting reasons for CLIENT's non-acceptance of such. This acceptance is final.

c) CLIENT is not charged for travel time to and from the CLIENT's site. Only time spent on-site is billed as training time; excluding those cases in which the CLIENT requires the COMPANY trainer(s) to travel on the weekend, in which case CLIENT will be billed for weekend travel time at a rate of \$500 per weekend day.

d) If CLIENT travels to COMPANY location for training, then CLIENT agrees to pay all expenses related to transportation of CLIENT's employees.

e) All requests for supporting documentation shall be made within thirty (30) calendar days of invoice delivery. Such documentation will consist of quoted internet rates within 7 days from the date the request is received by the COMPANY and not actual receipts. Such quotes will be deemed acceptable documentation if price is within 25% of actual amounts charged to CLIENT, adjusted by unusual or seasonal travel circumstances.

f) The rates for Verification Testing shall be the same as the Training/Implementation rates set forth in the Investment Summary.

COMPANY AGREEMENT TERMS AND CONDITIONS

- g) The rates listed in the Investment Summary do not include any tax or other governmental impositions including, without limitation, sales, use or excise tax. All applicable sales tax, use tax or excise tax shall be paid by CLIENT and shall be paid over to the proper authorities by CLIENT or reimbursed by CLIENT to COMPANY on demand in the event that COMPANY is responsible or demand is made on COMPANY for the payment thereof. If tax-exempt, CLIENT must provide COMPANY with CLIENT's tax-exempt number or form.
- h) Payment is due within thirty (30) calendar days of invoice.
- i) In the event of any disputed invoice, CLIENT shall provide written notice of such disputed invoice to Attention: COMPANY Controller at the address listed on the cover of this Agreement. The Data Conversion Process

Purpose

One of the most difficult aspects of software transition revolves around data conversion. This process takes place in one of two ways:

1. The manual method - In the manual mode the Client enters data from the existing system into the new Tyler Technology system.
2. The automated method - In the automated mode a software program is written or coded in order to facilitate moving information from the existing system to the new Tyler Technology system.

This document is provided to aid the Client in understanding the automated conversion process and provide clear direction as to the responsibility and the scope of the process.

Who should read this document?

The obvious answer to this question is the individual at the Client site that is most responsible for the transition. Specifically it should be:

1. The individual responsible for extracting and providing data from the old system to the Tyler Technology system.
2. Any individuals responsible at a department level.
3. Any individual that would benefit from understanding the conversion process

The Conversion Process

The process itself has a predefined set of steps that must take place for a successful conversion.

1. Initial data extraction - The Client must perform the preliminary extraction and transmission of data.
2. Data Evaluation - Tyler Technologies will then be responsible for evaluating the information that has been transmitted. Upon a successful evaluation the Client will be contacted for further scheduling.
3. Conversion scheduling - Once a schedule has been decided upon, Tyler Technologies will proceed in development of the conversion programs. During the development step, the Client will be responsible for providing knowledge and insight into the information from their current system
4. On-Site Conversion - Upon Tyler Technology's arrival at the Client's site for the conversion, the Client will be responsible for a final extraction of the data. In most situations the Client will not have to transmit the final extraction to Tyler Technologies. The Tyler Technology trainer on site will assist the Client in preliminary INCODE application setup that is required for the conversion as well as execute the conversion programs and assist in the verification of the converted information's integrity.

Even though the Tyler Technology trainers possess a great deal of knowledge in the area of conversion, it is ultimately the Client's responsibility to validate any converted data. The sections that follow clearly outline and describe each of the above steps.

tylerworks.

Data Extraction and Transmission of Data

As stated in the contract, the Client must supply data in ASCII file format with unpacked data fields. This terminology is sometimes considered confusing. The ASCII (pronounced as AS-key) is an abbreviation that represents the American Standard Code for Information Interchange. This standard was established in 1967 and still represents one of the most important standards in the computer industry. Since that time, some vendors have deviated from this standard. An example would be IBM's has a proprietary standard format abbreviated EBCDIC (pronounced EBB-see-dik). This is their current standard on the System36 and AS400. Vendors also use compression techniques in their data structures to pack numeric fields and dates. Since these techniques are not standard and vary from vendor to vendor, we are unable to process this information. In the simplest of terms the Client's data that is transmitted to The Tyler Technology system should be legible in a standard text processing program such as Windows textpad or wordpad. The characters that you view on screen should be the same characters that are on your computer keyboard.

File Descriptions and layout

The contract further states that the Client must supply sufficient file descriptions and layout information for the data. Sometimes file descriptions will be referenced as data definitions. Normally data files have one row after another. Each row represents a record or grouping of information. As an example, a vendor file would normally have a row for each vendor in the system. The rows then have to be broken down further into columns or fields. An example of a field in the vendor file could be vendor name. The file description provides the information needed to know exactly what position each field starts and stops in each row. In all cases, file descriptions are absolutely necessary for any type of conversion.

Media Type

Also outlined in the contract is the media type that the information can be transmitted to The Tyler Technology system. Unless the Client's existing system has a unix operating system, the most desirable media to transmit the data would be a cd. In situations where a writable cd is not available the Client can submit the information on a zip disk or 4mm tape. If a 4mm tape is used then the Client should transfer the information to the tape using the standard Windows backup software. The Client may also submit the data via email when the Client has a compression utility such as winzip and a fast and reliable internet connection. When the Client's existing system has a unix operating system, the Client may use any of the methods mentioned above with the additional transmittal method of a 4mm tape with the maximum capacity of 4gb or a ¼ inch tape with the maximum capacity of 1gb. The Client should include the Data Transmission Form with the media. If the Client is using email to transmit the data please include the information from the Data Transmittal Form in the email as text or an attachment. In situation where none of the above options are available to the Client, arrangements should be made with Tyler Technologies as to viable alternatives. These alternatives may involve additional fees.

There are certain vendors that Tyler Technologies has had considerable conversion experience and has developed processes to extract the information from their proprietary data files. Other vendors store their data in Microsoft Access or Microsoft SQL Server database. It is possible in these situations that the Client can provide their existing data files in their current state without data extraction. In this scenario the Client would only be responsible for providing a backup of their current data.

The first data extraction is for the sole purpose of developing the conversion software. This extraction should contain all the tables or files that are to be converted along with the appropriate record layouts. An incomplete extraction can produce time delays and undesirable results during the actual conversion.

tylerworks.

Final Data Extraction

The final data extraction will be performed on the day of or a day very close to the final conversion. This extraction will be coordinated with Tyler Technology's conversion personnel and implementation coordinator.

Data Extraction Assistance

In almost all instances the Client owns its data, but the current software provider's file descriptions will be considered proprietary information. There will be scenarios where the software provider will not provide file descriptions or will provide the descriptions for a fee. Any fees required by the vendor are the responsibility of the Client and are not included in the contract. In many situations the data will have proprietary fields with no easy solution for extraction. Tyler Technology's years of experience with data conversions has lead to many innovative techniques for data extraction. When the Client has exhausted their available options, Tyler Technologies can assist with the data extraction for additional fees. The Client will have the responsibility of contacting their sales representative for a quote for additional services. Upon receipt of a purchase order from the Client, Tyler Technologies will proceed with this assistance.

Conversion Scheduling

Once Tyler Technologies has received the data from the Client a three stage evaluation process will be implemented. Media will be evaluated as to its readability. Each data file transmitted will be reviewed as to its format, file description, and estimated complexity. When these two stages have been successfully completed, Tyler Technology's implementation coordinator will schedule with the Client a time for the data conversion, conversion assistance, and training. The third stage of the evaluation is more detailed and will follow in approximately 3 weeks. During this stage the data will be evaluated for its completeness, validity, and mandatory fields needed in the conversion. If problems arise during this process, Tyler Technologies will communicate to the Client the problems. The Client will be responsible for resolving the problems in a timely a manner as possible so that the schedule is not affected. If no problems arise then the Client can assume that Tyler Technologies is on schedule.

Timing is an important element during a data conversion. Scheduling of the conversion will revolve around the most advantageous cutoff dates. For example, if a Client bills their utility customers at the end of each month, the best time to do the conversion would be during the last two weeks of the month. Financial conversions will be easier to validate if performed after a period has been closed. All of these elements will be discussed by the implementation coordinator with the Client during scheduling.

Conversion Program Development

After Tyler Technologies receives and validates the Client's data, the development of the conversion program will begin. During the development process, questions about the Client's current data or application may be raised. The Client is responsible for providing contact information for staff member(s) that are capable of responding to questions for each module being converted.

It is important for the Client to understand that Tyler Technologies has a minimal amount of experience with the Client's current application. Questions raised by Tyler Technologies will be the result of analyzing data. There are a significant number of times when the data being analyzed does not correspond with the information that the Client views on the screen in their current application. Providing staff members that have an in depth knowledge of the Client's current application is a key element of a successful conversion.

tylerworks.

Part of the development process will be testing the program with the data provided in the first extraction. This testing will take place at Tyler Technology's facilities. Any potential problem areas will be communicated to the Client.

Conversion Assistance

As part of the contract, a Tyler Technology's trainer will be at the Client location during the actual conversion. The trainer will provide conversion assistance in the areas of preliminary setup, conversion program execution and data validation. Even though the primary focus of the trainer is a successful completion of the conversion process, the trainer will be providing a limited amount of training in certain areas. In a majority of cases, the trainer responsible for the conversion assistance will also be responsible for the training that will occur either before or after the conversion.

It is important to note that the trainer will not be the programmer responsible for the creating or modifying conversion program. The trainer will be responsible for conveying to the programmer discovery of Client specific information before the final conversion and any mistakes found after the conversion. The Client will need to facilitate the trainer by providing a comfortable place to work, access to facilities before and after normal work hours and telephone communications.

Data Validation

The final step in the conversion process is the data validation. Much attention will be given to data integrity during the testing phase by the program developers. The conversion assistant will also spend time testing the integrity of the information. Balances and the output of processes will be tested after the conversion. A visual inspection of different modules will be performed by choosing different records on a random base. But Data validation is ultimately the responsibility of the Client.

Conclusion

After over 20 years and several hundred conversion experiences, Tyler Technologies has determined that there are several key factors in a successful conversion. The Client needs to have a realistic expectation of what is going to happen. The Client must understand that there are no pleasant conversions; therefore a successful conversion is one that provides the least amount of displacement and discomfort. More than likely, the Client will have to change their schedules and prepare for a heavier work load during the conversion. The Client has to realize that the data on the system being converted is exactly how the data will be on the new system. The conversion process does not clean up or correct any information during the conversion process. The old adage "garbage in, garbage out" is very relevant during the conversion process. One example would be a general ledger conversion where the current system's ledger is out of balance. After the conversion, the INCODE general ledger will be out of balance. Conversions maybe somewhat mystical but the process is not magical. And finally, to have a successful conversion, there must be a team approach by all those involved.

TYLER TECHNOLOGIES WEB SERVICES - INTERNET BASED PRODUCTS SUBSCRIPTION AGREEMENT TERMS AND CONDITIONS

THIS AGREEMENT is effective as of the date of acceptance set forth at the end hereof, and is by and between Tyler Technologies, Inc., hereinafter referred to as COMPANY and the party signing this agreement as the "SUBSCRIBER".

If the SUBSCRIBER has a unique domain name, COMPANY can seamlessly point it to COMPANY's web server.

COMPANY Utility Billing On-Line The COMPANY Utility Billing On-Line Component allows the SUBSCRIBER to make available certain information from their COMPANY Utility Billing System to citizens with Internet access. Information is transferred from SUBSCRIBER to COMPANY daily. This information is posted to SUBSCRIBER's web site, which is hosted on COMPANY's web server. With the proper security clearance, citizens with Internet access have access to the data which can include: Consumption information, service level information, requests for service, accounting information and the opportunity to pay their Utility Bill over the Internet using a credit card.

COMPANY Court On-Line The COMPANY Court On-Line Component provides the ability for municipal court fines to be paid by credit card or electronic check via the Internet. Since it was designed by COMPANY, this system interfaces seamlessly with COMPANY's InCourt Municipal Court System.
