MEMO TO MAYOR AND TOWN COUNCIL

Date: August 20, 2012

From: Buzz Walker, Water Superintendent

(edw)

Subject: Eastside Golf Course Irrigation

Pursuant to Town Council direction, temporary water service was established to the Chaparral Pines and Rim Club golf courses irrigation water storage lakes adjacent to 613 N. Redbud Circle. Water service in the amount of approximately 500,000 gallons per day commenced on June 21, 2012 and ended on July 24, 2012. All water supplied was delivered from a fire hydrant and through a 4" water meter.

The golf course operator was billed for thirty four days of available water service at \$500.00 per day and for water use in the amount of 15,225,000 gallons total. The total charge to the golf course operator was \$118,143.63.

Groundwater levels near the Town's water production wells utilized for the irrigation water supply were measured before the irrigation water service began and after the water service ended. Water level fluctuations do not appear to be unusual for this time of year as a result of the increased pumping for golf courses irrigation.

cc: Town Clerk
